

HARSH VERMA

Microsoft Certified MS-SQL Server Database Administrator

A-2 Ashoka Apartment, Mulund (East), Mumbai - 400081 | +91-7977211987 | harshverms@gmail.com
harsh-git-sql.github.io/harsh.github.io

PROFESSIONAL SUMMARY

MS-SQL Server Database Administrator with 4+ years of experience managing 500+ production, development, and QA SQL Server environments (2GB-25TB) for mission-critical payment gateway and insurance platforms. Microsoft Certified Azure Database Administrator Associate (DP-300) with practical knowledge of IaaS and PaaS database architectures, including on-premises to Azure SQL Managed Instance migration via Log Replay Service and blob-based backup/restore strategies. Skilled in high availability (Always On, Distributed Availability Groups, Log Shipping, Mirroring, Replication, Geo-Replication, Failover Groups/Clustering), disaster recovery, performance tuning, and incident management for high-transaction-volume systems.

TECHNICAL SKILLS

Databases: MS SQL Server 2022 / 2019 / 2017 / 2016 / 2014 / 2012, Azure SQL Managed Instance, Azure IaaS & PaaS Database Solutions

Cloud & Migration: Azure Database Migration (On-Premises to Managed Instance via Log Replay Service), Backup/Restore from Blob Storage

High Availability / DR: Always On Availability Groups, Distributed Availability Groups, Database Mirroring, Log Shipping, Replication, Failover Clustering, Geo-Replication, Failover Groups

Operating Systems: Windows Server 2022, 2019, 2016, 2012, 2008 (Standard & Enterprise)

Tools & Platforms: ServiceNow (SNOW), Jira, Commvault, Sentry One, Rubrik, Foglight, SSH, RDP

Security: Transparent Data Encryption (TDE), User/Role-Based Access Management

PROFESSIONAL EXPERIENCE

Executive DBA | Worldline

Jan 2025 - Present

- Administer and support MS SQL Server infrastructure for a leading payment gateway platform processing millions of merchant transactions daily across diverse payment modes.
- Applied SQL Server patching, Service Packs, and Cumulative Updates across multiple versions to keep production environments secure and current.
- Automated routine database operations by scheduling and maintaining SQL Server Agent jobs and troubleshooting job failures to maintain infrastructure uptime.
- Installed and configured SQL Server across multiple versions and environments, standardizing setup for consistency and reliability.
- Performed DR Drills (switchover/switchback) on databases using Always On, Database Mirroring, Log Shipping, and Replication to validate disaster recovery readiness.
- Executed daily and monthly database archiving processes to manage data growth and maintain performance.
- Monitor and tune SQL Server performance to resolve high CPU, high memory, and blocking issues, maintaining peak transaction throughput.
- Lead major incident calls, diagnosing root causes under pressure and restoring service quickly to minimize business impact.
- Implemented table partitioning strategies to improve query performance and manageability on large datasets.

SQL Server DBA | Capgemini

Dec 2021 - Jan 2025

Client Projects: American Family Insurance (AmFam), Main Street America (MSA), Homesite, Connect

- Managed and supported 500+ SQL Servers (2GB-25TB) across Production, Development, Integration, and QA environments for multiple insurance clients, ensuring high availability and peak performance.
- Created and managed database users, roles, and permissions in line with least-privilege access principles.
- Led decommissioning and migration of SQL databases to new servers, including full migration of jobs and logins across all environments.

- Diagnosed and resolved performance issues including high CPU, high memory, and blocking, applying tuning techniques to optimize server health.
- Designed and implemented backup and recovery strategies, processes, and automated jobs aligned with business continuity requirements.
- Resolved critical issues during Major Incident calls through strong communication and rapid problem-solving, minimizing downtime.
- Took ownership of a major project transition into Capgemini, learning the infrastructure, processes, and key stakeholder relationships to ensure seamless support continuity.
- Partnered with stakeholders to analyze database issues and deploy production changes proactively, preventing costly outages and enabling point-in-time recovery on request.
- Trained and mentored new joiners on day-to-day DBA tasks, client communication, and incident/service request management.
- Implemented Transparent Data Encryption (TDE) to secure sensitive data at rest.
- Investigated and resolved a recurring nightly automatic failover issue on an Amazon EC2-hosted SQL Server instance, performing root-cause analysis to close out a long-standing production incident.
- Resolved user-reported connectivity issues and performed failover/failback activities in clustered environments.

KEY ACHIEVEMENTS

- Received the highest performance rating (Rating 1) at Capgemini for proactive contribution to the team.
- Awarded “Extra Miler of the Month” (January 2024) for active participation and effort on the project.
- Awarded “Star of the Month” (May 2024) for outstanding performance within the SQL Database team.
- Secured 2nd position in department for 2 consecutive years during graduation.

HANDS-ON LABS (DP-300 PREPARATION)

- Migrated on-premises SQL databases to Azure SQL Managed Instance using the Log Replay Service (LRS).
- Configured cloud-native database backup and restore operations utilizing Azure Blob Storage.
- Provisioned and managed Azure IaaS (SQL Server on VMs) and PaaS (Azure SQL Database/Managed Instance) solutions.
- Implemented advanced backup and recovery strategies, including long-term retention (LTR) policies.
- Enforced data security standards using Transparent Data Encryption (TDE) and Dynamic Data Masking (DDM).
- Optimized database performance using Query Store, Query Performance Insights, index maintenance, and statistics updates.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) — [Verify Credential](#)
- Microsoft Certified: Azure Database Administrator Associate (DP-300) — [Verify Credential](#)
- SQL (HackerRank) — [View Certificate](#)
- SQL Database Administration
- ITIL 4 Foundation

EDUCATION

- B.Tech, Electronics and Communication Engineering — AKTU, Lucknow (2021)
- HSC (Science) — Maharashtra State Board (2017)
- SSC — ICSE Board (2015)
